Experience

- **ArrowPoint Tax Services - Software Developer Intern** (2021-Present)

  -Responisble for the front-end development of a large scale tax calculation tool/service using JavaScript, React.js, HTML5, CSS3, and Bootstrap.
  -Calculations were done on the front-end and were updated live to display client data.
  -Created scripts/programs to break down thousands of tax related documents to sort and utilize the data using JavaScript and Node.js.
  -Translated client tool requirements to the development team to allow for smooth communication and efficient progress.
  -Various forms of testing and debugging throughout the entire development and maintenance of the tool when in production.

- **Direct Dental - Contracted Software Developer** (2021-Present)

  -Contracted to do a complete overhaul of website, both front-end and back-end (In-progress).
  -Revamped numerous pages appeal, retention, and navigation using JavaScript, React.js, Ruby on Rails, HTML5, CSS3, Bootstrap.
  -Assist in testing and debugging the website to find ways to increase usability and create a better user experience.
